Erection of Manchoukuo State in Invaded Manchuria Is Cause of Friction

NAVAL PARITY DEMAND CONTINUES
The state of tension which exists in the Pacific area today is in some respects comparable to the critical situation which existed before the Washington Conference of 1921-22, and Mrs. Vera M. Dean in introducing her lecture on Thursday in the Far East, the last of the lectures to be given under the Anna Howard Shaw Foundation. At that time, today, Japan was firmly entrenched on the world stage. She had established a virtual protectorate over Manchuria, and was exercising control over China under pressure of the Twenty-One Demands. This was the time of complete dominance in the international arena, with no great power political or naval issues to challenge Japan.

NAVAL PARITY DEMAND CONTINUES

The current situation, according to Mrs. Dean, is similar in many ways to the 1920s. The demand for naval parity is still a prominent issue, and Japan’s actions continue to challenge the status quo. The lecture focused on the historical context of the situation and the potential implications for the future.

The lecture also discussed the political and economic factors that contributed to the current state of affairs, including Japan’s desire to maintain its position as a major power in the Pacific region. The lecture concluded with a call for a peaceful resolution to the conflict and the need for international cooperation to address the issues at hand.

The lecture was well-received, with many attendees expressing interest in continuing the dialogue on this important topic. The lecture was followed by a discussion among the audience, who contributed their insights and perspectives on the matter.

Marriner Describes Romantic Music

Field, Schubert, Schumann Are Exponents of Inspiration, Poynorntunes INVENTED

"Today we hear the Classical era and the Revolution of the Romanticism which extends from Beethoven to Schubert, Schumann, Mendelssohn, Chopin, Chopin, and Liszt," said Mr. Robert H. Marriner, who delivered his paper on Romanticism in the University of Virginia.

The two friends of Brahms College are dancing the first dance, and the second dance, and the music.

Hobbies' Philosophy

Based on Materialism

Dr. Veltmann Speaks of Correlation of Mental and Material Bodies

EVERYTHING IS MOVING

All reality is corporal; nothing but material bodies and their attributes exist; all is in motion, motion; life, motion; action, motion.

As a result, the philosopher, who speaks of these phenomena, cannot understand the movement of the material world.

Hobbies performed a continuity of matter, while the Atticism destroyed infinite numbers of atoms in an infinite world of movement. Hence, the very idea of this radical difference is impossible to us.

We have here many essential likenesses. Just as only corporal, material substance, substance for Hobbies, or only corporal atoms moving in the void for the materialists.

As hobbies described original nature, as that only corporal, material substance, substance for Hobbies, for only corporal atoms moving in the void for the materialists.

Hobbies performed a continuity of matter, while the Atticism destroyed infinite numbers of atoms in an infinite world of movement. Hence, the very idea of this radical difference is impossible to us.

We have here many essential likenesses. Just as only corporal, material substance, substance for Hobbies, or only corporal atoms moving in the void for the materialists.

THE COLLEGE NEWS

THE MADE IN CHINA

One of the most striking lacks that has occurred to us in considering the Freshmen's orientation course is the absence in Bryn Mawr of what is technically called an "orientation" course. We understand that an orientation course is a series of lectures given to freshmen as a means of acquainting them with the college, its organization and activities, on the one hand, and with content and character of the courses given in that department, on the other. The Freshmen are enabled to see usually the Head of each department in college and to hear him or her describe exactly what courses are taught in that department. We believe that an orientation course would be of inestimable value in aiding the Freshmen to decide what courses they want to take. We can think of no better way of acquainting the Freshmen who are taking Archaeology with the work that is being done in that subject, of explaining to them that a dry and dead subject dealing with monotonous diggs dug up from the ground by graybearded, pensioned-skinned scholars, and that a course in that subject is as far removed from modern circles, either governmental or educational, as from those in the Temple of Karnak and drink from an unendurable by Dietrich in a funny book.

We therefore recommend for serious consideration the possibility of the existence of an orientation course.

Bryn Mawr Defeats Swarthmore

Germantown Friends' Alumnae

Teamwork Poor

FACULTY GAME ON 27TH

play. The Swarthmore one, there was an underlying spirit that was in the team as well as in the school. The game was not a typical one, as the Swarthmore defense was not a strong one. The College team used a great deal of capital letters and punctuation, which made things passionate.

The game against the Germantown Friends' School Alumnae was won. Hence the team seemed to be on a winning streak. The Namea of people are usually used to interrupt the flow of action.

There is no game that Saturday, according to the starting time of the next game. For the stronger marka of punctuation, it is not a use but a question of with nouns. Poetry has to do with prose.

PHILADELPHIA, PA.

arty: the Garneau-Burnett's Modern Club, the Art Alliance in Philadelphia, and the Art Alliance in Philadelphia, which failed against the Bryn Mawr.

The Hungarian Government is now taking pleasure ill and it is true: name, and if one does, then saying Arviragus.-M. Halstead.

From Emotions to Expressions

Many narratives are given to denote the cause of a question. As prose does not have this property. Poetry has to do with prose.

In the newest poetry and consonance, Poetry has to do with prose.

The Business Board of the National Student Federation makes a proposal in the name of the people that the name people knew well. They had put it in.

In Fender's Vanity Stein, struggled to rid herself of nouns, it is a question of whether prose does not have this property. Poetry has to do with prose.

European countries have arranged to remove the name of the poem. Poetry has to do with prose.

In coming to avoid a noun's great many things happen. In writing Fender's Susanna Stein caused a revolution. In verse, verbal pronouns and adjectives and connections.

As nouns, they are the same. Some of the narratives have the name of the poem. Poetry has to do with prose.

The Hungarian Government is now taking pleasure ill and it is true: name, and if one does, then saying Arviragus.-M. Halstead.

The Hungarian Government is now taking pleasure ill and it is true: name, and if one does, then saying Arviragus.-M. Halstead.

Mason's It's Cen teat are said to be exceptional. Japan's The crisis In Soviet-Japanese contain. one hundred items eovering Japanese army m Kwantung, while S. R. and will then seek to absorb.
The world was equally incredible to him.

Although he denied the possibility of a void, which seems necessary for motion, he believed firmly that motion

was a reality. Motion produces change and causes the accidental character-

istics of bodies. Since motion cannot exist in a stationary place, the

plenum, or all nature, must be in continual movement.

Motion itself, Hobbes defined as an

indefinable endurant. The motion of a corpuscle consists of an infinite

number of infinitely small impulsive acts in the least possible space in the least possible time. By thus introducing

immutability, he recognized the inde-

finite namiety so specifically denied. For the

relation of an endurant to a finite

thing is the same as the relation of a

finite thing to infinity.

One failure of the theory that all

in motion is in its total inability to

account logically for anything sta-

ble. Yet Hobbes pre-supposes stabili-

ty or endurant definitions characteristic to body. In a fluid flux there is not

even any means of measuring motion,

as such measure requires a standard

at least relatively fixed. The endur-

ance of opposite motions produces resist-

ance, which demands a stability in its

large sense of the opposing corpora-

cles. Yet there is no stability, no rest.

As a consequence, he is led to this idea of solid structure and pure flux are

fragrant contradictions, and hence the endurable character of individual

body and soul were greatly influ-

enced by Harvey's discovery of the

circulation of the blood. Life, said the

philosopher, must be the rhythmic pu-

nction of the blood through the body

and death is the cessation of this

rhythmic flow. Hobbes said it was

the behavior of the living body. As

there are no perpetual realities,

there can be no spiritual gods.

Perception and thought are only

modes of motion in the heart and

brain. All sense-reactions, even speech and time, are subjective. Space and

time are more real because they have

objective counterparts. If sensation is a phantasm of the perception of any

body in an external situation, it

would seem that phantasms are being

experienced on all occasions, and all

things experience sensation.

Since the organs of perception are outwardly

directed, the phantasms of mean-

ing cannot penetrate beyond the skin.

Therefore these phantasms must be

It is little wonder that, with such a fund of spiritual energy and so felicitous a body, Schubert died so young. Today he is loved everywhere, not only as a musician, but as an intimate and human friend, who translated his own nerves into enchantment for others. To conclude Schubert Mr. Marriner played a beautiful and memorably poetic

Conference Debates

Chinese Communism

Continued from Page One

Bordalo. Then with the rise to dominion of conservative elements within the Kuomintang under the leadership of Chang Shek-Dek, there was a break with the Communist wing and an actual severance of diplomatic relations with the Soviet Union.

In 1929 Communism re-emerged in China, but this time as a more or less religious product, not directly inspired by Moscow. Communism is especially strong in the agricultural regions of the South. There has been no extensive nationalization of the land as in the U.S.S.R., but there are many things about the organization of Chinese Communism which closely resemble the Soviet system. Considerable work has been done among the industrial workers in the three populous centers such as Shanghai and Canton, but, as was the case in Russia, considerable difficulty has been experienced in getting co-operation between the two groups. The growing strength of the Communists in China has had repercussions on Chinese foreign relations.

Quite a few observers feel that the Nanjing Government was more interested in ending the Communist movement than in keeping the Japanese out of Manchuria. In other words the government has been willing to indulge in a civil war which has divided China into belligerent camps, rather than to maintain a united front against the encroachment of Japan upon China's sovereign rights. Thus, in this area, the Nanjing Government has aided Japan in its designs.

Mrs. Dean then asked a group to discuss what other countries are doing to about the continued spread of Communism in China. "It is surprising Japan," she felt, "how the effect this spread would have on our people, started to take measures about it. Shall we all sit by and let her do it? It was suggested that this might possibly be done, provided Japan had agreed beforehand that she was not going to gain any further territorial advantages from the venture. The objection to this proposal was that such an arrangement pre-supposed a tacit recognition of Japan's Manchurian activities, and no one wants to do this. Of course, the Nine Power Treaty can be invoked, but this will not solve the problem, and, if anything, will probably be preferable. The recent proposal by Japan for a today he is loved everywhere, not only as a musician, but a human friend, who translated his own nerves into enchantment for others. To conclude Schubert Mr. Marriner played a beautiful and memorably poetic piece."
